WATER DISPENSERS

- Alkaline & essential minerals
- 5-stage filtration
- RO membrane technology
- Serves ambient, still or sparkling
- Space saving
- Energy saving

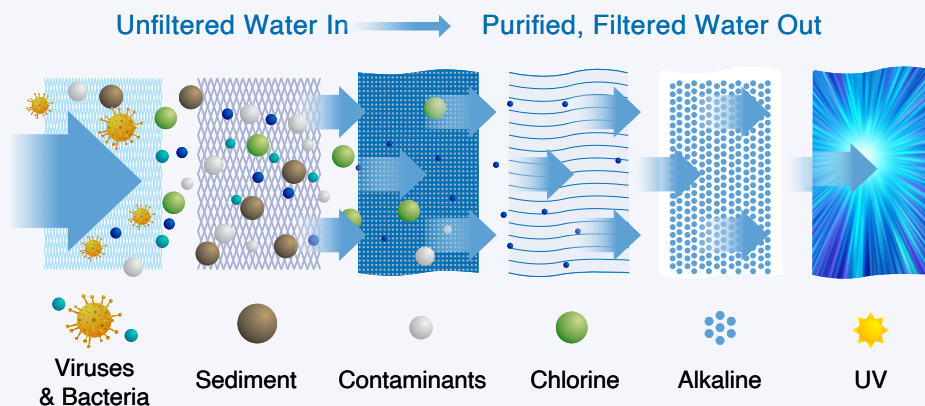

Experience Pure, Great-Tasting, Alkaline Water in Every Drop

Our multi-stage filtration system removes impurities, enhances taste, and delivers refreshing alkaline water with balanced mineralization—enough to support health without excessive minerals or high sodium. PPF Filter: Captures particles larger than 5 microns for crystal-clear water. UDF/GAC Filter: Removes chlorine, chemicals, and odors. CTO Filter: Eliminates unwanted color and lingering smells.

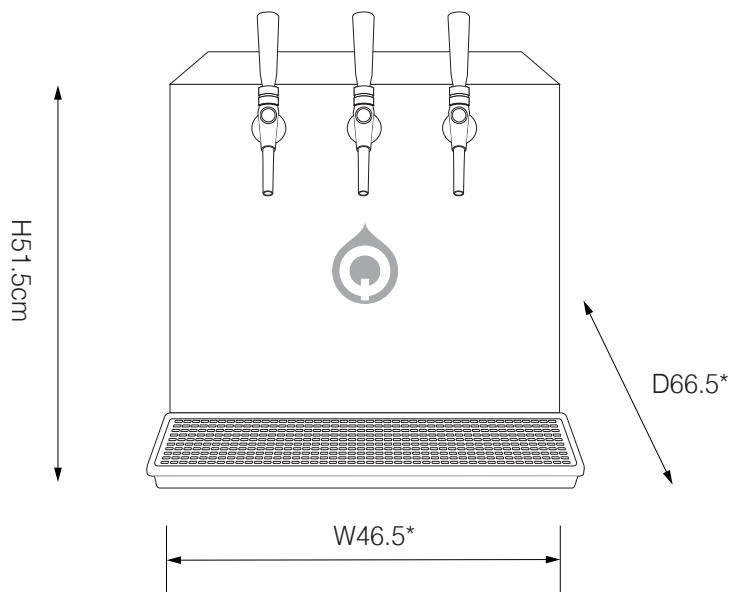

UF Filter: Blocks harmful impurities, flushed out with ease.

RO Filter: Purifies at the molecular level for crisp, clean water.

T33 Filter: Perfects taste, making every sip sweet, smooth, and refreshing.

AQB-B150-CT-M

Cooling Mode:	Compressor	Tank Volume:	22L
Cooling Power:	1HP	Sparkling Volume:	2L
Voltage:	220-240V/50-60HZ	Dimensions:	D66.5*W46.5*H51.5cm
Cooling Temp:	4-12°C	Packaging:	D65*W56*H63cm
Refrigerant:	R290 or R134a:	NW:	43.5kg
Water Pressure:	0.1-0.4 Maps	GW:	46kg
Water Temp Intake:	5—38°C	Power Consumption	1.3kW/24h

Note: It is recommended to have the following clearance around and above this unit: 6” side, 2” back, 6” top
